Overview

Substance abuse is one of the most important issues facing athletics and society today. The use of illegal drugs, misuse of legal drugs and supplements, use of performance-enhancing substances, illegal and misuse of alcohol and inappropriate use of tobacco are inconsistent with the standards expected of student-athletes at GW. The athletics administration and the coaching staff at GW are committed to assisting any student-athlete who may have an alcohol or substance abuse problem. As a result, the Athletics Department chooses to take a strong and proactive stand against student-athlete use, misuse and/or involvement with illicit drugs, performance enhancing substances (including dietary supplements containing banned drugs) alcohol, and tobacco, and illicit drugs. Knowing the seriousness of substance abuse and how detrimental it is to an individual’s physical and mental well being, our first priority is for the student-athlete’s health, safety and welfare. Our goal at GW is to provide all student-athletes a positive, healthy and successful environment.

Every member of the athletics community is responsible for knowing the risks associated with substance use and abuse. Medically and socially, the risks can seriously interfere with an individual’s performance both as a student and as an athlete, and can endanger the well being of their teammates. Therefore, student-athletes, coaches, and staff are responsible for knowing and understanding the relevant university policies, federal, state, and local laws and are obligated to conduct themselves in accordance with these policies and laws. A summary of relevant policies and laws, the harmful effects of such use, and a list of local resources for additional information and counseling is contained in GW’s annual disclosure to students under the Drug Free Schools and Communities Act Amendments of 1989, also available online at: http://police.gwu.edu/alcohol-and-drug-policies.

Purpose

The intent of this Policy is to prevent substance use and abuse by student-athletes through a program of education, testing, and professional guidance.

- Education – providing student-athletes and athletics staff with accurate information about the problems associated with substance use in sport, and promoting health and safety in sport
- Testing – analyzing urine or saliva specimens to detect prohibited substances student-athletes may introduce to their bodies and consequences resulting from use
- Professional Referral – facilitating appropriate counseling, treatment and rehabilitation for student-athletes

Alcohol, Tobacco and Drug Education

Student-athletes who are educated about substance use in sport are more likely to make informed and intelligent decisions about usage. Therefore, the Athletics Department will conduct an annual substance use and abuse education program. This program will be designed to review individual team, athletic department, institutional, conference and NCAA alcohol, tobacco and other drug policies. Appropriate educational materials, including this Policy as well as the list of banned drug classes, will be given to student-athletes. All student-athletes will be required to complete educational offerings, whether presented in sessions or in online modules. Make-up sessions are available for those individuals who must miss a scheduled educational session for an approved reason.

Sessions may include a review of NCAA alcohol, tobacco and drug policies including the tobacco ban, list of banned drug classes, testing protocol, and viewing the NCAA drug-education and drug-testing video. Dietary supplements, their nutritional weaknesses and associated health risks, will be discussed. Time will be allowed for questions from student-

---

1 This Policy has been approved by the Athletics Department of The George Washington University (GW). GW reserves the right to amend this Policy from time to time. Furthermore, this Policy is not to be construed as a contract between GW and the student-athlete.

GW Athletics Department Drug Education and Testing Policy updated 3/13/09; 07/26/10; 7/22/11; 9/27/11; 7/16/12; 7/23/13; 8/5/14; 7/17/15; 10/17/16
athletes. Educational programs may be specially arranged to provide student-athletes the opportunity to learn more about specific dangers of substance use and abuse.

Consent to Participate and To Test For Banned Drugs

As a condition of participating in intercollegiate athletics (practice and competition) and receiving all benefits associated with such participation (e.g., athletic aid, athletic academic support, sports medicine) at GW, each student-athlete must annually sign a GW Student-Athlete Consent Form (Appendix A) agreeing to participate in the education programs and undergo drug testing and authorizing the release of test results in accordance with this Policy. Failure to consent to or to comply with the requirements of this Policy may result in suspension from practice and/or competition, or termination of eligibility to participate in intercollegiate athletics at GW (this would include the receipt of all benefits associated with such participation). Each student-athlete will be provided with a copy of this Policy and parents and/or legal guardians will be informed that they may obtain a copy of this Policy on the Athletics Department website (www.gwsports.com). Student-athletes will be required to participate in the Drug Education Program outlined above and be given the opportunity to ask any questions they may have about the program, testing or related issues prior to signing the GW Student-Athlete Consent Form.

Alcohol Policy

GW does not condone the illegal or otherwise irresponsible use of alcohol. It is the responsibility of every member of the university community to know the risks associated with alcohol use and abuse. Possession or consumption of alcoholic beverages by individuals under the age of 21 is a violation of the District of Columbia liquor laws and GW policy. Likewise, it is illegal for anyone to supply alcoholic beverages to persons under the age of 21. Violations of the GW alcohol policy and related GW and sport-specific policies will result in sanctions as established under those policies.

Tobacco Policy

The NCAA, pursuant to NCAA Bylaws 11.1.5 and 17.1.8, prohibits the use of tobacco products, including spit and chewing tobacco, by all game personnel (e.g., student-athletes, coaches, athletic trainers, managers and game officials) in all sports during practice and competition. GW will uphold and enforce this policy. Game officials for every sport will uphold and enforce this policy as established by their respective sport committees.

Dietary Supplements

Dietary supplements and ergogenic aids may contain banned drugs. The labeling of dietary supplements may not be accurate or may be misleading. Terms such as “healthy” or “all natural” do not mean dietary supplements are free from banned drugs or are safe to take. Dietary supplements may not only be detrimental to your health but also may cause a positive drug test so please be cautious when using.

Student-athletes must keep the athletic training staff and/or team physician aware of all prescribed drugs, over-the-counter medications, vitamins and/or dietary supplements that he or she intend to take or may be taking. While the student-athlete may review the products with the Assistant Athletic Director/Sports Medicine (AAD/SM) or Department nutrition consultant, the student-athlete is ultimately responsible for deciding whether to take the product and accepting any health or other consequences (e.g., a positive drug test result). Student-athletes also are encouraged to contact The National Center for Drug Free Sport (Drug Free Sport) and/or their own physicians with any and all questions or concerns regarding banned drugs, dietary supplements, or any other substances. Student-athletes, coaches, and athletics staff may contact Drug Free Sport’s Dietary Supplement Resource Exchange Center (REC) at:

   REC Hotline: 1-877-202-0769
   Website: www.drugfreesport.com/REC
   Password: ncaa1

---

2 Student-athletes will also be required to annually sign the NCAA Drug Testing Consent form as a condition of participation.
**Other Banned Drugs/Substances**

Student-athletes may not use the substances identified as NCAA Banned Drugs. The drug screening process will include analysis of the NCAA list of banned-drug classes, which can be found in Appendix B. The NCAA list of banned-drug classes is not exhaustive and is subject to change from time to time. An updated listing of the NCAA banned-drug classes can be found on the NCAA’s web site at [www.ncaa.org](http://www.ncaa.org), and student-athletes will be held accountable for all banned substances on the most current list.

**Methods of Selection for Drug Testing**

**Unannounced Random Testing**

All student-athletes who have signed the GW Student-Athlete Consent Form (Appendix A) and are listed on the NCAA or institutional GW squad list are subject to unannounced year-round random testing.

Student-athletes listed on the NCAA or institutional squad list that have exhausted their eligibility or who have career-ending injuries will not be selected for testing. Student-athletes will be selected for testing from the NCAA or institutional squad list by a third party provider using a computerized random number program. Selection for testing, specimen collection, reporting and evaluation may be completed by either GW or its designated third-party provider.

**Reasonable Suspicion Testing**

A student-athlete may be subject to testing at any time when, in the judgment of the GW Athletics Department Sports Medicine Office, there is a reasonable belief to suspect the student-athlete is using or has used a banned drug. Such reasonable suspicion may be based on information received by the Athletic Director or designee from an individual deemed reliable by the Athletic Director or designee. The Athletic Director will present such information to the AAD/SM and Team Physician for a determination based on the information contained in the form. A GW Athletics Department Drug Testing Reasonable Suspicion Reporting Form (Appendix C) must be completed by the individual(s) who suspect(s) the student-athlete is using or has used a banned substance. Reasonable suspicion may be considered, but not limited to: 1) observed possession or use of substances appearing to be banned drugs, 2) arrest or conviction for a criminal offense related to the possession or distribution of banned substances - not necessarily for profit, 3) student disciplinary charges for drug/alcohol use, possession and/or distribution, or disorderly conduct, fighting, or other violations of GW’s Code of Student Conduct; and 4) observed abnormal appearance, conduct or behavior that may cause someone to reasonably suspect the use or abuse of a banned substance. Examples of such abnormal appearance, conduct or behavior may include, but are not limited to the following: significant decline in academic or athletic performance, missing class, falling asleep in class, significant weight gain or loss, increased injury rate or illness, lethargy, agitation or nervousness, short temper, acts of violence or loss of friendships.

The AAD/SM and Team Physician will make a determination within 48 hours of receiving the information from the individual(s) mentioned above at which time the Athletic Director or designee will meet with the student and will provide him or her with the GW Drug Testing Notification Form (Appendix D).

**Preseason and Postseason/Championship Screening**

GW may drug test any student-athlete or team during preseason and those who are likely to qualify for postseason championship competition thirty (30) days prior to participation in championship activities.

**Re-entry Testing**

A student-athlete who has had his or her eligibility to participate in intercollegiate athletics suspended by GW because of a positive drug test result will be required to undergo a re-entry drug test and test negative prior to regaining eligibility to participate in intercollegiate athletics. The Athletic Director or designee shall arrange for re-entry testing no earlier than 30 days prior to the completion date of the student-athlete’s suspension (see sanctions) and a counselor or specialist

---

3 The term “eligibility to participate in intercollegiate athletics” used throughout this Policy refers to competition during both the traditional and nontraditional season and may also include practice, receipt of athletics aid and services provided by the Office of Academic Support for Student-Athletes and Sports Medicine.

GW Athletics Department Drug Education and Testing Policy

2016-2017
involved in the student-athlete’s case evaluates medical, health and safety factors and subsequently indicates that re-entry into the intercollegiate sports program is appropriate.

**Follow-up Testing**

A student-athlete who has his or her eligibility to participate in intercollegiate athletics reinstated following a positive drug test under this Policy shall be subject to additional testing throughout his or her athletic eligibility at GW.

Testing will be unannounced and will be required at a frequency determined by the Athletic Director or his/her designee in consultation with a counselor or specialist involved in the student-athlete’s case.

**Notification and Reporting for Collections**

The Athletic Director or designee will notify student-athletes of any drug testing to be conducted under this Policy. Notification shall be in person or by direct telephone communication (e.g. no email, no voice mail, no text messages). The Athletic Director or designee will notify the student-athlete of the date, time and location to report to the collection station. At the time of notification, the Athletic Director or his/her designee will have the student-athlete read and sign GW Drug-Testing Notification Form (Appendix D). If the student-athlete refuses or is unavailable to meet with the Athletic Director or designee without satisfactory explanation; declines to sign the Notification Form, or declines to provide a sample or alters or manipulates his or her sample to alter the integrity and/or validity of the sample, such acts will be treated in the same fashion as a positive drug test result for a street drug or other illicit substances under the terms of this Policy.

The Athletic Director or designee shall be in the collection station to certify the identity of the student-athletes selected for drug testing and will be responsible for security of the collection station. Student-athletes shall provide picture identification when entering the drug-testing station. The Athletic Director or designee must remain in the collection station until all student-athletes complete the collection process.

**Specimen Collection Procedures (See Appendix E)**

**Reporting of Results**

All student-athlete personal information and records associated with the drug education and drug-testing program under this Policy will be confidential to the extent permissible under applicable law and NCAA and GW policies and results will be released only to those individuals with a legitimate need to know, as determined by the Athletic Director and/or AAD/SM.

Urine samples will be collected and sent to an independent certified laboratory for analysis. A split-sample collection method will be utilized, dividing the provided urine specimen into two vials: the “A” bottle and “B” bottle. Each A bottle sample will be tested to determine if banned substances are present. If an initial screening and further confirmation of the A bottle indicates a banned substance is present, a positive test will be reported. Under this policy, an A bottle positive represents an official positive result. The B bottle may be tested separately at the request of the student-athlete as part of the appeals process (See “Right to Appeal” below).

If the laboratory reports a specimen as manipulated, substituted or adulterated, the student-athlete will be deemed to have a positive drug test result for a street drug or other illicit substances under the terms of this Policy.

All verified positive test results, as well as all reports of specimen manipulation, adulteration or substitution, shall be reported to the Athletic Director or designee, Sport Administrator, Associate Athletic Director/Compliance, AAD/SM, and the student-athlete’s head coach. The Athletic Director will notify the student-athlete of the findings.
Medical Exception Process

GW recognizes that some banned drugs may sometimes be used for legitimate medical purposes. Accordingly, the Athletics Department allows exceptions to be made for student-athletes with a documented medical history demonstrating a need for regular or temporary use of such a substance.

Student-athletes are required to inform the Office of Sports Medicine of all medications (prescribed and over-the-counter) they are taking. The Office of Sports Medicine will maintain in the student-athlete’s medical record a letter from the prescribing physician that documents the student-athlete’s medical history demonstrating the need for regular use of such a drug. The letter should contain information as to the diagnosis (including appropriate verification), the period of time during which the student-athlete is authorized to take the drug, medical history and dosage information. In the event a student-athlete tests positive, the AAD/SM in consultation with the Team Physician will review the student-athlete’s medical record to determine whether a medical exception should be granted under this Policy. This medical exemption may only be granted for testing conducted under this Policy and does not apply to any drug testing conducted by the NCAA.

Positive Drug Testing Definitions

A drug screening test is classified as a positive test when an Athletic Department approved drug testing laboratory detects a banned substance in a student-athletes urine specimen.

The following conduct or occurrences shall cause a student-athlete to be subject to sanctions under this policy in the same manner as if that student-athlete had a positive drug test:

1. An Athletic Department approved drug testing laboratory determines a urine sample has been altered or tampered.
2. An Athletic Department approved drug testing laboratory indicates that foreign substances were either ingested by the student-athlete and/or added to a urine sample in an effort to destroy or disguise traces of substances.
3. A student-athlete is convicted of a drug related criminal offense or is found responsible for a University drug related violation.
4. If a student-athlete fails to report or refuses to submit to an institutional test after notification by an athletic department official through the drug testing notification form.
5. If a student-athlete refuses to sign the drug testing notification form.
6. If a student-athlete fails to produce an adequate urine specimen within 4 hours from signing into the testing site

Positive Drug Test Sanctions

All drug test results accumulate during the entire time that an individual is a student-athlete at GW. Any student-athlete who tests positive for a banned drug as described in this Policy shall be subject to the following sanctions under this Policy with the understanding that the student-athlete must be eligible to participate (e.g., compete) per NCAA and University rules in order for their suspension to be served:

Performance Enhancing Substances

First Offense

The student-athlete’s eligibility to participate in intercollegiate athletics shall be suspended immediately for a minimum of 50% of regular season contests, conference and postseason contests in all sports. If the student-athlete competes in multiple sports, the 50% penalty will apply separately for each sport. In addition, a student-athlete testing positive will also be precluded from participating in all non-traditional competitions including, but not limited to, foreign tours, special team trips, scrimmages and exhibition events. Being prohibited from participating in non-traditional competitions does not count toward serving a 50% sanction from regular season contests, conference and postseason contests. The Athletic Director or designee may impose a longer suspension on a case-by-case basis. If the suspension imposed may not be
completed during the current academic year, the suspension will rollover to the following academic year. It should be
noted that the student-athlete may be permitted to practice, receive athletics aid and athletic academic support and sports
medicine services during the period of their suspension (any of these may be suspended by the Athletic Director as he/she
deems appropriate).

The student-athlete will be subject to Re-entry testing prior to being removed from suspension.

An NCAA positive drug test will count as a GW positive drug test. However, NCAA drug testing sanctions will apply.
In certain cases GW sanctions may also apply (e.g., mandatory drug evaluation session through the University Counseling
Center or other facility designated by GW).

The student-athlete will be required to complete a mandatory drug evaluation session through the University Counseling
Center (UCC) or other facility designated by GW. No later than three (3) days following the reporting of the positive
drug test result to the student-athlete, he or she shall contact the designated facility to schedule an appointment for an
evaluation. The student-athlete may be referred to off-campus services. The student-athlete and/or his or her
parents/legal guardians may be required to assume any and all costs associated with such treatment.

The designated facility shall determine the appropriate form(s) of intervention and rehabilitation needed by the student-
athlete, based on the circumstances of the case. The student-athlete will not be permitted to return to practice in their
sport(s) until he or she has complied with the facility’s recommendations for treatment. [Return to competition will
require a re-entry test being negative.]

If the student-athlete regains his or her eligibility to participate in intercollegiate athletics, he or she will be required to
undergo unannounced follow-up drug testing through the remainder of his or her student-athlete eligibility at GW.

Failing to comply with the designated counselor’s directions (e.g., UCC) for treatment regardless of having a negative
reentry drug test will result in the student-athlete not being reinstated until such time of their successful completion of
treatment.

**Second Offense**

If a student-athlete tests positive a second time, it is apparent that the student-athlete has a significant problem or has
made conscious value judgments as to his/her behavior.

If a student-athlete tests positive a second time for a performance enhancing substances, his or her eligibility to
participate in intercollegiate athletics may be permanently suspended for the remainder of the student-athlete’s eligibility
at GW. The student-athlete would be informed of his or her permanent suspension via letter from the Athletic Director
sent certified mail.

A meeting between the student-athlete, Athletic Director, Head Coach and AAD/SM will be held to advise and encourage
the student-athlete to pursue further treatment. GW will not be responsible for any and all costs associated with such
treatment.

Consistent with all University, conference and NCAA regulations, the student-athlete will be subject to cancellation of
athletics aid for the subsequent semester, if any, in the current year and non-renewal of athletics aid for the ensuing
academic year.
Street Drugs and Other Illicit Substances

First Offense

The student-athlete’s eligibility to participate in intercollegiate athletics shall be suspended immediately for a minimum of 25% (10% for marijuana) of regular season contests, conference and postseason contests in all sports. If the student-athlete competes in multiple sports, the 25% (10% marijuana) penalty will apply separately for each sport. In addition, a student-athlete testing positive will also be precluded from participating in all non-traditional competitions including, but not limited to, foreign tours, special team trips, scrimmages and exhibition events. Being prohibited from participating in non-traditional competitions does not count toward serving a 25% (10% marijuana) sanction from regular season contests, conference and postseason contests. The Athletic Director or designee may impose a longer suspension on a case-by-case basis. If the suspension imposed may not be completed during the current academic year, the suspension will rollover to the following academic year. The student-athlete may be permitted to practice, receive athletics aid and athletic academic support and sports medicine services during the period of their suspension (any of these may be suspended by the Athletic Director as he/she deems appropriate).

The student-athlete will be subject to re-entry testing prior to being removed from suspension.

An NCAA positive drug test will count as a GW positive drug test. However, NCAA drug testing sanctions will apply. In certain cases GW sanctions may also apply (e.g., mandatory drug evaluation session through the UCC or other facility designated by GW).

The student-athlete will be required to complete a mandatory drug evaluation session through the UCC or other facility designated by GW. No later than three (3) days following the reporting of the positive drug test result to the student-athlete, he or she shall contact the designated facility to schedule an appointment for an evaluation. The student-athlete may be referred to off-campus services. The student-athlete and/or his or her parents/legal guardians may be required to assume any and all costs associated with such treatment.

The designated facility shall determine the appropriate form(s) of intervention and rehabilitation needed by the student-athlete, based on the circumstances of the case. The student-athlete will not be permitted to return practice in their sport(s) until he or she has complied with the facility’s recommendations for treatment. [Return to competition will require a re-entry test being negative.]

If the student-athlete regains his or her eligibility to participate in intercollegiate athletics, he or she will be required to undergo unannounced follow-up drug testing through the remainder of his or her student-athlete eligibility at GW.

Failing to comply with the designated counselor’s directions (e.g. UCC) for treatment regardless of having a negative reentry drug test will result in the student-athlete not being reinstated until such time of their successful completion of treatment.

Second Offense

If a student-athlete tests positive a second time his or her eligibility to participate in intercollegiate athletics shall be suspended immediately for a minimum of 12 months (50% of allowable contests/dates for marijuana). The minimum 12-month suspension (50% contests/dates for marijuana) shall include all regular season competitions including non-traditional season competitions, foreign tours, special team trips and conference and postseason championship competition in all sports in which the student-athlete participates. The Athletic Director or his/her designee may impose a longer suspension on a case-by-case basis. If the suspension imposed may not be completed during the current academic year, the suspension will rollover to the following academic year. The student-athlete may be permitted to practice, receive athletics aid and athletic academic support and sports medicine services during the period of their suspension (any of these may be suspended by the Athletic Director as he/she deems appropriate).
The student-athlete may be charged with the loss of a minimum of one season of competition (e.g. the 12 month suspension may not be considered a “red shirt” year nor may it be considered a medical hardship).

The student-athlete will be subject to re-entry testing prior to being removed from suspension.

An NCAA positive drug test will count as a GW positive drug test. However, NCAA drug testing sanctions will apply. In certain cases GW sanctions may also apply (e.g., mandatory drug evaluation session through the UCC or other facility designated by GW).

The student-athlete will be required to continue treatment through the UCC or other facility designated by GW. No later than three (3) days following the reporting of the second positive drug test result to the student-athlete, he or she shall contact the designated facility to schedule an appointment for an evaluation and continued treatment. The student-athlete may be referred to off-campus services. The student-athlete and/or his or her parents/legal guardians may be required to assume any and all costs associated with such treatment.

The designated facility shall determine the appropriate form(s) of intervention and rehabilitation needed by the student-athlete, based on the circumstances of the case. The student-athlete will not be permitted to return practice in their sport(s) until he or she has complied with the facility’s recommendations for treatment. [Return to competition will require a re-entry test being negative.]

If the student-athlete regains his or her eligibility to participate in intercollegiate athletics, he or she will be required to undergo unannounced follow-up drug testing through the remainder of his or her eligibility at GW.

Failing to comply with the designated counselor’s directions (e.g., UCC) for treatment regardless of having a negative reentry drug test will result in the student-athlete not being reinstated until such time of their successful completion of treatment.

Third Offense

If a student-athlete tests positive a third time, it is apparent that the student-athlete has a significant problem or has made conscious value judgments as to his/her behavior.

If a student-athlete tests positive a third time for street drugs or other illicit substances, his or her eligibility to participate in intercollegiate athletics shall be permanently suspended for the remainder of the student-athlete’s eligibility at GW. The student-athlete shall be informed of his or her permanent suspension via letter from the Athletic Director sent certified mail.

A meeting between the student-athlete, Athletic Director, Head Coach and AAD/SM will be held to advise and encourage the student-athlete to pursue further treatment. GW will not be responsible for any and all costs associated with such treatment.

Consistent with all University, conference and NCAA regulations, the student-athlete will be subject to cancellation of athletic aid for the subsequent semester, if any, in the current year and non-renewal of athletic aid for the ensuing academic year.

Confirmation Testing

Student-athletes who test positive for a banned substance may request confirmation of the test result. A written request must be received by the Athletic Director within forty-eight (48) hours following the student-athlete’s receipt of notice of the positive finding. Upon the student-athlete’s request for confirmation of the positive finding, the Athletic Director or designee will request the laboratory to perform confirmation testing on the student-athlete’s B bottle, if applicable. All costs associated with testing the B sample will be the responsibility of the student-athlete. Testing of bottle B must take
place at the same laboratory utilized for testing bottle A. The student-athlete may choose to be present at the opening of specimen B at the laboratory. If the student-athlete does not wish to be present at the opening of the B bottle, but desires to be represented, arrangements will be made for a surrogate to attend the opening of bottle B. The surrogate will not be involved with any other aspect of the analysis of the specimen. The student-athlete or his/her surrogate will attest to the sample number and the integrity of the security seal prior to the laboratory opening of bottle B. Bottle B findings will be final. If bottle B results are negative, the drug test will be considered negative.

Right to Appeal

Student-athletes who test positive under this Policy will be entitled to request a hearing before the GW Drug Testing Appeals Board (Appeals Board). The Appeals Board consists of the Athletic Director, the AAD/SM, the Faculty Athletics Representative, a Head Coach (of a sport not involving the current student-athlete) and one (1) other faculty member as appointed by the Faculty Athletics Representative. The student-athlete will remain ineligible, if applicable, for competition pending the outcome of the appeal. Requests for such a hearing must be made within five (5) business days of notification of the positive test result or B sample result. Requests must be in writing and received by the Athletic Director. The Athletic Director will forward the written request to the Appeals Board.

The hearing shall take place within five (5) business days following receipt of the written request. Either the student-athlete or other parties involved may request an extension of this time to the Athletic Director, who will consider whether to grant the extension upon a showing of good cause. These proceedings shall include an opportunity for the student-athlete to present evidence, as well as to review the results of the drug test. The student-athlete may have an advisor or other representative present. However, the role of advisor/representative shall be limited to consultation with the student-athlete; an advisor/representative may not address the Appeals Board or question participants in the proceeding. The proceedings shall be confidential to the extent permissible by law and GW policy. The decision by the Appeals Board regarding the sanction to be imposed under this Policy will be final.

The Faculty Athletics Representative is the designated chairperson of the Appeals Board and the decision by the Appeals Board will be made in writing by each member present with a decision requiring a majority vote of those present.

Other Sanctions

Sanctions identified under this Policy are imposed by the Athletics Department pursuant to this Policy. Student-athletes who test positive for either an NCAA or GW administered drug test are forbidden to drive University vehicles (e.g., van) or vehicles rented by the Department for University business (e.g., away-from-home competitions) for the remainder of the eligibility at the University. Student-athletes should also be aware that they may be subject to other GW policies relating to students, e.g., the Code of Student Conduct. Conduct that may violate this Policy and/or result in a drug test may also violate such other GW policies, which may result in the imposition of other sanctions affecting the student-athletes’ status at GW. Further, the Athletics Department reserves the right to impose additional sanctions or restrictions on a student-athlete’s eligibility for violations of the Code of Student Conduct. Finally, student-athletes remain subject to all criminal laws and penalties.

Voluntary Disclosure/Safe Harbor Program

A student-athlete eligible for the GW Safe Harbor Program may refer himself or herself to the Program for voluntary evaluation and counseling. A student-athlete is not eligible for the Safe Harbor Program after he or she has been informed of an impending drug test, after having received a positive GW or NCAA drug test or after being found in possible violation of any University drug or alcohol related policy (e.g., University Police Department incident report).

GW will work with the student-athlete to prepare a Safe Harbor treatment plan, which may include confidential drug testing. If the student-athlete tests positive for a banned drug upon entering the Safe Harbor Program, that positive test will not result in any administrative sanction unless the student-athlete tests positive in a subsequent retest or the student-athlete fails to comply with the treatment plan. A student-athlete will be permitted to remain in the Safe Harbor Program.
for a reasonable period of time, not to exceed thirty (30) days, as determined by the treatment plan. A student-athlete will not be permitted to enter the Safe Harbor Program thirty (30) days prior to NCAA or conference postseason competition.

If a student-athlete tests positive for any banned drug after entering the Safe Harbor Program (e.g. must be defined as “new use”) or fails to comply with the Safe Harbor treatment plan, the student-athlete will be removed from the Safe Harbor Program, an initial Safe Harbor positive test will be treated as a first positive and a subsequent positive as a second positive, subject to the sanctions explained in this policy.

While in compliance with the Safe Harbor Program treatment plan, the student-athlete will not be included in the list of student-athletes eligible for random drug testing under this Policy. However, student-athletes in the Safe Harbor Program may be selected for drug testing by the NCAA.

The Athletic Director, Team Physician, AAD/SM, and the student-athlete’s Head Coach may be informed of the student-athlete’s participation in the Safe Harbor Program. The assistant coach(es) also may be informed at the discretion of the head coach. Other university employees may be informed only to the extent necessary for the implementation of this policy.

The George Washington University Department of Athletics and Recreation reserves the right to amend this policy at any time.
I, ____________________________________, hereby acknowledge that I have received a copy of, read and been
given the opportunity to ask questions regarding the Drug Education and Testing Program implemented for the
Athletics Department at The George Washington University (GW). I understand the policies, procedures and my
responsibilities as described in such policy.

As a condition to my participation in intercollegiate athletics at GW, I consent to participate in the Drug Education
and Testing Program. I understand that my participation in this program includes the collection and testing of my
urine at various times during academic year for those drugs on the NCAA list of banned-drug classes.

I further consent to the release of the results of any drug test to the Athletic Director or his/her designee, Associate
Athletic Director/Compliance, my Head Coach, the Assistant Athletics Director/Sports Medicine and/or Assistant
Athletic Trainers, Team Physician, the GW Drug Testing Appeals Board, and/or others with a legitimate need to
know, as determined by the Athletic Director and/or the Assistant Athletics Director/Sports Medicine. To the
extent set forth in this document, I waive any privilege I may have in connection with such information.

I fully understand that the GW Drug Education and Testing Policy and Program is separate and distinct from the
NCAA drug-testing program and its sanctions, however, I also understand that sanctions may be imposed by GW
under its Drug Education and Testing Policy and Program upon a positive result under the NCAA drug-testing
program.

Notwithstanding anything to the contrary in the policy, I fully understand that I may be suspended from
competition and/or practice by the team physician if credible evidence suggests that such competition and/or
practice poses a health and safety risk to myself, my teammates, and/or my competitors.

The George Washington University, its officers, employees, and agents are hereby released from legal
responsibility and/or liability for the release of any information and/or record as authorized by this consent form. I
fully and forever release and discharge the aforementioned parties from any claims, demands, rights of action, or
causes of action, resulting from my participation in GW’s Drug Education and Testing Policy and Program
including those claims, demands, rights of action, or causes of action arising out of any positive result under such
Drug Education and Testing Policy and Program.

2016-17 NCAA Banned Drugs

It is your responsibility to check with the appropriate or designated athletics staff before using any substance.

The NCAA Bans the Following Classes of Drugs:

1. Stimulants;
2. Anabolic Agents;
3. Alcohol and Beta Blockers (banned for rifle only);
4. Diuretics and Other Masking Agents;
5. Street Drugs;
6. Peptide Hormones and Analogues;
7. Anti-estrogens; and

Note: Any substance chemically related to these classes is also banned.

The institution and the student-athlete shall be held accountable for all drugs within the banned drug class regardless of whether they have been specifically identified.

Drugs and Procedures Subject to Restrictions:

1. Blood doping;
2. Gene doping;
3. Local anesthetics (under some conditions);
4. Manipulation of urine samples; and
5. Beta-2 Agonists permitted only by prescription and inhalation.

NCAA Nutritional/Dietary Supplements Warning:

Before consuming any nutritional/dietary supplement product, review the product with the appropriate or designated athletics department staff. There are no NCAA approved supplement products.

1. Dietary supplements, including vitamins and minerals, are not well regulated and may cause a positive drug test result.
2. Student-athletes have tested positive and lost their eligibility from using dietary supplements.
3. Many dietary supplements are contaminated with banned drugs not listed on the label.
4. Any product containing a dietary supplement ingredient is taken at your own risk.

Check with your athletics department staff prior to using a supplement.
Examples of NCAA Banned Substances in Each Drug Class

Note to Student-Athletes: There is NO complete list of banned substances. Do not rely on this list to rule out any label ingredient.

1. **Stimulants**: Amphetamine (Adderall); caffeine (guarana); cocaine; ephedrine; methamphetamine (DMAA); methylphenidate (Ritalin); synephrine (bitter orange); methylhexaneamine, "bath salts" (mephedrone); octopamine; DMBA; phenethylamines (PEAs); etc. **Exceptions**: phenylephrine and pseudoephedrine are not banned.

2. **Anabolic Agents** (sometimes listed as a chemical formula, such as 3,6,17-androstenetrione): Androstenedione; boldenone; clenbuterol; DHEA (7-Keto); epi-trenbolone; etiocholanolone; methasterone; methandienone; nandrolone; norandrostenedione; ostarine, stanozolol; stenbolone; testosterone; trenbolone; SARMS (ostarine); etc.

3. **Alcohol and Beta Blockers** (banned for rifle only): Alcohol; atenolol; metoprolol; nadolol; pindolol; propranolol; timolol; etc.

4. **Diuretics** (water pills) and **Other Masking Agents**: Bumetanide; chlorothiazide; furosemide; hydrochlorothiazide; probenecid; spironolactone (canrenone); triameterene; trichlormethiazide; etc.

5. **Street Drugs**: Heroin; marijuana; tetrahydrocannabinol (THC); synthetic cannabinoids (e.g., spice, K2, JWH-018, JWH-073).

6. **Peptide Hormones and Analogues**: Growth hormone (hGH); human chorionic gonadotropin (hCG); erythropoietin (EPO); IGF-1; etc.

7. **Anti-Estrogens**: Anastrozole; tamoxifen; formestane; ATD; clomiphene; SERMS (nolvadex); Arimidex; clomid; evista; fulvestrant; aromatase inhibitors (Androst-3, 5-dien-7, 17-dione), etc.

8. **Beta-2 Agonists**: Bambuterol; formoterol; salbutamol; salmeterol; higenamine; norcoclaurine; etc.

Additional examples of banned drugs can be found at [www.ncaa.org/drugtesting](http://www.ncaa.org/drugtesting).

Any substance that is chemically related to the class, even if it is not listed as an example, is also banned!

Information about ingredients in medications and nutritional/dietary supplements can be obtained by contacting the Resource Exchange Center (REC) at 877-202-0769 or [www.drugfreesport.com/rec](http://www.drugfreesport.com/rec). Password: ncaa1, ncaa2 or ncaa3.

It is your responsibility to check with the appropriate or designated athletics staff before using any substance.
The George Washington University Athletics Department
Drug Testing Reasonable Suspicion Reporting Form

I, __________________________, under the reasonable suspicion provision contained in the GW Athletics Department Drug Education and Testing Policy and Program, report the following objective sign(s), symptom(s) or behavior(s) that I reasonably believe warrant ______________________________ be referred to the Athletics Director or his/her designee for possible drug testing. The following sign(s), symptom(s) or behavior(s) or sudden changes in such behaviors were observed by me over the past _____ hours and/or _______ days.

Please check below all that apply:

The Student-Athlete has shown:

____ irritability
____ loss of temper
____ poor motivation
____ failure to follow directions
____ verbal outburst (e.g. to faculty, staff, teammates)
____ physical outburst (e.g. throwing equipment)
____ emotional outburst (e.g. crying)
____ weight gain
____ weight loss
____ sloppy hygiene and/or appearance

The Student-Athlete has been:

____ late for practice
____ late for class
____ not attending class
____ receiving poor grades
____ staying up too late
____ missing appointments
____ missing/skipping meals

The Student-Athlete has demonstrated the following:

____ dilated pupils
____ constricted pupils
____ red eyes
____ smell of alcohol on the breath
____ smell of marijuana
____ staggering or difficulty walking
____ constantly running and/or red nose
____ recurrent bouts with a cold or the flu (give dates ______
____ over stimulated or “hyper”
____ excessive talking
____ withdrawn and/or less communicative
____ periods of memory loss
____ slurred speech
____ recurrent motor vehicle accidents and/or violations (give dates ____________)
____ recurrent violations of GW’s Student Code of Conduct

Other specific objective findings include:

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

Signature of Athletics Department Staff                Date

For Official Use Only

☐ Reasonable suspicion finding upheld
☐ Reasonable suspicion finding denied

Signature of Assistant Athletics Director/Sports Medicine

Signature of Team Physician

Appendix C
The George Washington University Drug-Testing Program
Year-Round Student-Athlete Notification

Student-Athlete: ___________________________  GWid: __________________

Notification Date: ____________  Time of Notification: ____________ am/pm

Student-Athlete Notified: _______ in person  ______ direct phone contact

Sport: ____________________________

Institutional Representative:
I certify the above student-athlete has been notified of his/her selection for drug testing and informed that failure to sign the notification form or failure to appear for drug testing will be treated as if there was a positive test for a banned substance other than a street drug.

Institutional Representative Signature: ______________________________________

I, The Undersigned:

-Acknowledge being notified (either in person or by direct telephone contact) to appear for drug testing and have been notified to report to the drug testing station with picture identification at:

__________________________ on ____________ at ________ am/pm
       (location)      (date)      (time)

• I will be prepared to provide an adequate specimen and will not over hydrate [DO NOT DRINK TOO MANY FLUIDS.] I understand that providing numerous diluted specimens may be cause for additional testing of the sample provided and/or require me to provide additional samples at future dates.
• I understand failure to appear at the site on or before the designated time will constitute a withdrawal of my previous consent to be tested as previously indicated on the Drug Testing Consent form and could result in a one-year period of ineligibility.
• The following banned drug classes will be tested as defined by NCAA Bylaw 31.2.3.4:

By signing, I have been notified of my selection for drug testing by The George Washington University Athletics Department, and am aware of what is expected of me in preparation for this drug-testing event.

Student-Athlete’s Signature: ______________________________________

I can be reached at the following telephone number on test day: ____________________________
1. Only those persons authorized by the client representative and certified collector will be allowed in the collection room. The certified collector and client representative will determine the release of a selected student-athlete from the collection room prior to completing the specimen collection process.

2. Upon arrival, student-athlete will provide photo identification and/or a client representative will identify the student-athlete. The student-athlete will then print his/her name and arrival time on the Roster Sign-In Form.

3. The student-athlete will select a Custody & Control Form (CCF) from a supply of such and work with collector and client representative to complete necessary information before proceeding with the specimen collection process.

4. The student-athlete will select a specimen collection beaker from a supply of such and will be escorted by a collector (same gender) to the restroom to provide a specimen. The student-athlete will place a unique barcode onto the beaker. And then rinse his/her hands with water and then dry hands.

5. The collector will directly observe the furnishing of the urine specimen to assure the integrity of the specimen.

6. The student-athlete will be responsible for keeping the collection beaker closed and controlled.

7. Fluids and food given to student-athletes who have difficulty voiding must be from sealed containers (approved by the collector) that are opened and consumed in the station. These items must be free of any other banned substances.

8. If the specimen is incomplete, the student-athlete must remain in the collection station until the sample is completed. During this period, the student-athlete is responsible for keeping the collection beaker closed and controlled.

9. If the specimen is incomplete and the student-athlete must leave the collection station for a reason approved by the certified collector and client representative, specimen must be discarded.

10. Upon return to the collection room, the student-athlete will begin the collection procedure again.

11. Once an adequate volume specimen is provided; the collector will escort the student-athlete to the specimen processing table.

12. The specimen collector will instruct the student-athlete to closely observe the specimen processing steps and will then measure the specific gravity.

13. If the urine has a specific gravity below 1.005, no value will be recorded on the CCF and the specimen will be discarded by the student-athlete with the collector observing. The student-athlete must remain in the collection station until another specimen is provided. The student-athlete will provide another specimen.

14. If the urine is concentrated (1.005 SG or higher), the specimen processor will record the specific gravity value on the CCF and then measure the urine’s pH if in range (4.5-7.5 inclusive), the specimen processor will record the pH value on the CCF in the appropriate area. If the student-athlete has a pH greater than 7.5 or less than 4.5, the specimen will be discarded by the student-athlete with the collector observing. The student-athlete must remain in the collection station until another specimen is provided. The student-athlete will provide another specimen.
15. Once the specimen processor has determined the specimen has a specific gravity above 1.005 and a pH between 4.5 and 7.5 inclusive, the sample will be processed and sent to the laboratory.

16. If the laboratory determines that a student-athlete’s sample is inadequate for analysis, at the client’s discretion, another sample may be collected.

17. If a student-athlete is suspected of manipulating specimens (e.g., via dilution, substitution), the collector will collect another specimen from the student-athlete.

18. Once a specimen has been provided that meets the on-site specific gravity and pH parameters, the student-athlete will select a sample collection kit from a supply of such.

19. The specimen processor will open the kit, demonstrate to the student-athlete the vials are securely sealed, open the plastic, and open the A vial lid. The processor will pour the urine into the A and B vials and close the lids. The specimen processor should pour urine into vials above the minimum volume level (35 mL in A vial; 15 mL in B vial) and pour as much urine as possible into vials using care not to exceed the maximum levels (90 mL in A vial; 60 mL in B vial).

20. The specimen processor will securely close the lids on each vial and then seal each vial using the vial seals attached to the CCF; assuring seals are tightly adhered to the vials with no tears or loose areas.

21. The specimen processor must then collect all necessary signatures (collector, donor, witness, and collector/specimen processor) and dates/times where indicated on the CCF.

22. The specimen processor will place the laboratory copy of the CCF in the back pouch of the plastic bag and the vials the front pouch of the same bag. The bag should then be sealed. The sealed bag with vials will then be placed in the sample box. The box will then be sealed.

23. The student-athlete is then released by the collector.

24. All sealed samples will be secured in a shipping case. The collector will prepare the case for forwarding. When two split samples are collected and packaged, care must be taken to assure one sample is placed in the shipping container for shipment to the “drugs of abuse” laboratory and one sample is placed in the shipping container for shipment to the “anabolic steroids” laboratory.

25. After the collection has been completed, the samples will be forwarded to the laboratory and copies of any forms forwarded to the designated persons.

26. The samples become the property of the client.

27. If the student-athlete does not comply with the collection process, the collector will notify the client representative and Drug Free Sport.
