# HUBBARD HALL

## 2008 NAVY CREW

Located on Dorsey Creek just a few hundred yards from the Severn River, construction of "The Boathouse" was completed in 1930 and was designed to accommodate Navy's lone men's rowing team of 40 members. Since then, however, an additional two teams have been added to the program and the number of athletes competing has increased five-fold to its present day 200 rowers.

To accommodate this increase, the three-story building has undergone several remodeling efforts over the years, most recently in 1993 thanks to funding provided by Zachary and Elizabeth Fisher.

Current interior features of the building include ...

- ★ bays and storage racks for 32 eight-oared shells, plus 12 four-oared and eight pairs boats,
- ★ a machine and wood shop where Navy's full-time boatman works to keep the shells in racing form,
- ★ a 3,500-square foot weight room,
- ★ a 10-person rowing tank,
- ★ an exercise and training room with 30 ergometers,
- ★ a third-floor teaching classroom with video equipment,
- ★ the King Room, a paneled 1,600-square foot lounge,
- ★ and a dining facility which includes access to a balcony overlooking the wharf area.

The exterior of the building includes a large concrete apron facing the water and three 85-foot double-access docks for launch and recovery of the shells.
