This wallabee sure feels velvety soft on the outside,
but you can tell she's tough on the inside.
I should design a stick like that.

VELVET deBeer

I'll use titanium enhanced alloy
to make it lighter
and stronger
than composite shafts.

If I cover it with a thin, velvety coating,
it'll improve the feel of the stick in your hands
and give it a better grip.

And I'll make it in cool, offbeat colors
because I like cool, offbeat colors.

I'll call it the Velvet ~~stick~~, after
my little friend here.

and I'll donate a percentage of sales
to fight breast cancer.
