

This Is
FRIARTOWN

In the spring of 2006, the building began extensive renovations that are slated to be completed in 2008. Once completed, the Dunkin' Donuts Center will be one of the nation's premier state-of-the-art facilities seating more than 13,000 fans. The \$62 million project enhances almost every aspect of the arena and will include luxury boxes, new seats, a new video scoreboard, a new sound system, new concession stands, new lock-errooms, and a new weight training and fitness area. All this ensures that the Dunkin' Donuts Center will continue to attract top concerts and events to downtown Providence. More importantly, with the refurbished Dunkin' Donuts Center, the Friars will continue to play in one of the top college basketball facilities in the country.
