PENN STATE FOOTBALL

ADA PARKING
IMPORTANT CHANGES FOR 2014
Penn State is committed to fully meeting the needs of our ADA patrons and providing an enjoyable and safe game day experience to all of our fans. Our desire is to provide excellent service and the same opportunities that you have experienced in other locations.

**Why has ADA parking changed?**

Compliant parking spaces near the stadium are very limited, particularly in the general parking category. Recent construction such as Pegula Ice Arena, IM Building Expansion, Nittany Lion Softball Park, and storm water detention projects have impacted and/or taken away a great deal of game day ADA parking. Phase 2 of the IM Building Expansion began this spring and has taken most of the remaining area behind IM Building for the building addition and construction operations. The former tram route is also obstructed by construction.

In addition, Wagner and Shields parking lots, two lots used in the past for ADA parking, are only accessible from Curtin Road. Curtin Road is the main pedestrian corridor before and after the game. This vehicular/pedestrian conflict on Curtin Road is a tremendous public safety concern. These lots could only meet a small fraction of the demand for ADA parking resulting in a confusing and inequitable parking situation for our ADA patrons.
Advantages of Innovation Park:

• Accommodation of current ADA compliant parking demand with the ability to increase
  - Parking is on paved surfaces.
  - Parking is suitable for all weather conditions.

• Easy access to and from the lot
  - Arrival and departure should be comparatively easy because Innovation Park is an easy connection to the highways that access University Park.
  - During past severe weather events, we have used Innovation Park and offered shuttle service from this location. Every time we have gotten rave reviews. Those who parked at Innovation Park loved the location and the service and wondered why we do not offer this for every game.

• An efficient shuttle route to the most convenient accessible locations at the stadium.
  - 11 Buses will be used instead of trams.
  - The shuttle route to and from Innovation Park lots employs roads that flow much more efficiently both before and after the game and should provide a quick trip.
  - The shuttle will begin running in plenty of time for those traveling from Innovation Park parking to participate in the pre-game events near the stadium.
  - All patrons who need access to the Innovation Park parking will be able to ride the shuttles, so family and friends could catch a shuttle at the stadium to your tailgate.
  - The shuttle will run continuously throughout the game and after the game until all waiting fans have been served.

Directions to the Innovation Park Lot can be found on the back page.
• Tailgating
  - All normal tailgating needs provided for including restrooms and garbage disposal at Innovation Park.
  - In addition, non-ADA patrons with prepaid parking permits are permitted in this area, so this might afford you a new opportunity to tailgate near non-ADA qualified friends and family.
  - Friends and family can ride the shuttle from the stadium to Innovation Park to visit your tailgate.

Directions to Innovation Park Lot

GPS Address: 328 Innovation Blvd., State College, PA 16803-660

Traveling South on I-99/US-220 from Bellefonte: Take Exit 74 toward Innovation Park; Turn right onto Park Ave Connector; Take the 1st left onto Innovation Blvd; follow the signs and directions of parking staff.

Traveling North on I-99/East on US-322 Bypass from Port Matilda: Merge right onto US-322 E via Exit 73; Take Exit 73 toward Innovation Park; Turn left on E Park Ave; Turn slight right onto ramp; Turn left onto Innovation Blvd; follow the signs and directions of parking staff.

Traveling West on US-322 Bypass from Boalsburg: Take exit toward Innovation Park; Turn left onto E Park Ave; Turn slight right onto ramp; Turn left onto Innovation Blvd; follow the signs and directions of parking staff.
